

Amendment to the Specification:

Please amend the specification, by replacing paragraph [0019] with the following paragraph:

[0019] **Figure 1** schematically illustrates assembly of the full-length antigenomic RSV 9320 cDNA. Positions of various subclones used to assemble the full length antigenomic cDNA are indicated. The cDNA fragments obtained by RT/PCR were ligated through the indicated restriction enzyme sites. The fourth residue of the leader sequence at the antigenomic sense was either C ([SEQ ID NO:56](#)) or G ([SEQ ID NO:55](#)) as indicated.

Sequence Listing

Please amend the sequence listing by replacing the sequence listing with the substitute sequence listing that is submitted concurrently herewith.
